

Jianwei Sun

Curriculum Vitae

+1 (310) 923-6599
sunjianw1@ucla.edu

Education

- 2019 to Present **Ph.D. in Systems and Control**, University of California Los Angeles.
Advised by Prof. Dr. Jacob Rosen
- 2017 to 2019 **M.Sc. in Electrical Engineering**, ETH Zurich.
Cumulative GPA: 5.71/6
- 2012 to 2017 **B.A.Sc. in Engineering Science**, University of Toronto.
Cumulative GPA: 3.79/4

Research Experience

- Feb 2019 to Aug 2019 **Bionics Lab**, University of California Los Angeles.
"Improving Transparency in Physical Human-Robot Interaction for the EXO-UL8 Exoskeleton"
Project co-supervised by Prof. Dr. Jacob Rosen and Prof. Dr. Maryam Kamgarpour.
- Developed a Kalman Filter-based human torque estimator to improve the admittance control scheme of an 8 degree-of-freedom upper limb exoskeleton (C/C++)
 - Coauthored a paper on the improved control scheme for the IEEE International Conference on Rehabilitation Robotics
 - Investigated virtual reality-based games for post-stroke rehabilitation with the exoskeleton
 - Investigated and implemented methods for suppressing human-induced instabilities and other human-related safety concerns
- Feb 2018 to Aug 2018 **Institute for Dynamic Systems and Control**, ETH Zurich.
"Vehicle Platoon Control with Virtual Path Constraints"
Project co-supervised by Rajan Gill and Prof. Dr. Raffaello D'Andrea.
- Designed and implemented a distributed feedback-linearized admittance controller to enable safe human-interaction with a path-constrained quadrotor platoon (C/C++)
 - Primary author of a paper submitted to the IEEE Conference on Control Technology and Applications, and awarded Outstanding Paper Award and selected as finalist for Best Student Paper
- Oct 2017 to Feb 2018 **Computer Engineering and Networks Laboratory**, ETH Zurich.
"DCF77 Based Long-Term Timer"
Project co-supervised by Roman Trüb and Prof. Dr. Lothar Thiele.
- Designed and implemented a radio clock-based ultra-low-power clock synchronization device capable of overcoming arbitrarily long clock drift for wireless network devices (MSP430, C)
 - Developed a benchmark device based on received timepulses from GPS for characterizing the timer device to nanosecond precision (MSP430, Raspberry Pi, C, Python)

- Sep 2016 to **Reconfigurable Antenna Laboratory**, University of Toronto.
Jun 2017 *"Synthesis of a Multibeam Dual Reflectarray Beam Pattern Using Genetic Algorithms"*
Project supervised by Prof. Dr. Sean V. Hum.
 - Developed a genetic algorithm-based optimizer to solve a multi-objective non-convex beam synthesis problem for a Cassegrain reflectarray antenna system (MATLAB)
 - Coauthored a paper for the IEEE Antennas and Propagation Symposium
- May 2016 to **Institute for Dynamic Systems and Control**, ETH Zurich.
Aug 2016 Project co-supervised by Rajan Gill and Prof. Dr. Raffaello D'Andrea.
 - Developed toolchains for automatic dynamic response characterization of nonlinear brushless motor systems for quadrotor vehicles (C/C++, MATLAB)
 - Developed a motor selection tool to automatically scrape off-the-shelf motors from the web and suggest the best suited product based on dynamic response requirements (Ruby)
- May 2014 to **Department of Mechanical Engineering**, National University of Singapore.
Aug 2014 Project co-supervised by Goh Yu Feng and Prof. Dr. Koh Soo Jin Adrian.
 - Investigated dynamic responses of dielectric elastomers as soft actuators for use as artificial muscles (MATLAB)
 - Developed a waveform generator for a 5kV high voltage power supply used to stimulate elastomers (LabVIEW)

Work Experience

- Sep 2018 to **Apple, Wearable Systems**, Cupertino.
Feb 2019
 - Designed a drop-in replacement system-in-package for the Apple Watch for measuring coexistence issues that can only be quantified in system form-factor (Cadence)
 - Developed software to automate data extraction from the Apple Watch, handle data processing, and present results (Python)
 - Developed experiments to investigate another critical system coexistence concern between a power management IC and a MEMS sensor
- Jun 2017 to **Intel, Programmable Solutions Group**, San Jose.
Sep 2017
 - Developed hardware interfaces based on Avalon-Streaming to port an H.265/HEVC 4K video encoder to a PCIe accelerator card with the Intel Arria-10 FPGA (Verlog, VHDL)
 - Simulated and debugged hardware with ModelSim, VCS-MX simulators, and custom test scripts (Python)
- May 2015 to **Apple, Wearable Systems**, Cupertino.
May 2016
 - Designed a multi-purpose hardware validation platform from scratch, including schematic entry, component selection, and PCB routing (Cadence)
 - Developed a software API and kernel on a microprocessor to stress-test a sensor subject to unpredictable device and digital interface failures for 500 hours (MSP432, C/C++)
 - Successfully identified a rare reliability failure mode and aided cross-functional teams in arriving at a mass-production solution

Publications

- [JP1] **J. Sun**, Y. Shen, J. Rosen, "Sensor Reduction, Estimation, and Control of an Upper-Limb Exoskeleton," in *IEEE Robotics and Automation Letters*, vol. 6, no. 2, pp. 1012-1019, April 2021, doi: 10.1109/LRA.2021.3056366.
- [CP3] Y. Shen, **J. Sun**, J. Ma, J. Rosen, "Admittance Control Scheme Comparison of EXO-UL8: A Dual-Arm Exoskeleton Robotic System," *2019 IEEE 16th International Conference on Rehabilitation Robotics (ICORR)*, Toronto, ON, Canada, 2019, pp. 611-617, doi: 10.1109/ICORR.2019.8779545.

Encinar, "Synthesis of a multi-beam dual reflectarray antenna using genetic algorithms," *2017 IEEE International Symposium on Antennas and Propagation & USNC/URSI National Radio Science Meeting*, San Diego, CA, USA, 2017, pp. 1179-1180, doi: 10.1109/APUS-NCURSINRSM.2017.8072632.

Awards

- 2021 Grad Slam Top 10, University of California, Los Angeles.
- 2019 Best Student Paper Finalist, Outstanding Paper Award, 3rd IEEE Conference on Control Technology and Applications (CCTA).
- 2017 Dean's Honours List, University of Toronto, awarded for all academic years.
- 2016 University of Toronto, Center for International Experience Award, for funding summer research conducted at ETH Zurich.
- 2014 Nortel Institute Undergraduate Scholarship, University of Toronto.
- 2014 University of Toronto, Center for International Experience Award, for funding summer research conducted at the National University of Singapore.
- 2012 President's Scholars of Excellence entrance scholarship, University of Toronto.
- 2012 Alexander Rutherford Scholarship.

Conference Participation

- 2019 16th IEEE/RAS-EMBS International Conference on Rehabilitation Robotics. Podium presentation.
- 2019 IEEE/AIM Workshop on "Towards Soft Robotics for Biomimetics and Applications: Emerging Sensors, Actuators, and Methods". Poster.

Teaching and Mentoring Experience

- Apr 2021 to Jun 2021 **Teaching Associate**, ECE141 - Principles of Feedback Control, University of California Los Angeles (Spring Quarter).
20 hours per week
- Jan 2021 to Apr 2021 **Teaching Associate**, LS30B - Mathematics for Life Scientists (Python), University of California Los Angeles (Winter Quarter).
20 hours per week
- Sep 2020 to Dec 2020 **Lead Teaching Associate**, M20 - Introduction to Computer Programming with MATLAB, University of California Los Angeles (Fall Quarter).
20 hours per week
- Apr 2020 to Jun 2020 **Teaching Assistant**, LS30B - Mathematics for Life Scientists (Python), University of California Los Angeles (Spring Quarter).
20 hours per week
- Jan 2020 to Apr 2020 **Teaching Assistant**, LS30B - Mathematics for Life Scientists (Python), University of California Los Angeles (Winter Quarter).
20 hours per week
- Sep 2019 to Dec 2019 **Teaching Assistant**, M20 - Introduction to Computer Programming with MATLAB, University of California Los Angeles (Fall Quarter).
20 hours per week
- Aug 2016 to Jun 2017 **Mentor**, IEEE Student Branch, University of Toronto.
10 hours per week
- Mentored first and second year engineering students in hands-on electronics, design, and debugging (Arduino, C/C++)

Volunteering Experience

- Aug 2016 to Jun 2017 **Director of Events**, IEEE Student Branch, University of Toronto.
10 hours per week
- Headed logistics and operations for a hardware Hackathon event with focus on wireless embedded technologies, resulting the largest participant turnout in recent years
 - Negotiated with suppliers and sponsors to ensure sufficient funding for the club's operations
- 2013 to 2014 **Volunteer Team Member**, Supermileage Club, University of Toronto.
5 hours per week
- Designed the fuel pressurization system and engine dynamometer
 - Assisted in carbon fiber layups, development, and assembly of completely new vehicle
- 2011 to 2013 **Volunteer**, Telus Spark Science Center, Calgary.
5 hours per week
- 2010 to 2011 **Volunteer**, Canadian Red Cross, Calgary.
5 hours per week

Personal Projects

Github **HarryPlotter**, open source plotting library for MATLAB.

Video **Boomerang**, persistence of vision display.

- o Implemented a timing-critical continuous self-calibration algorithm to calculate frame flashing rates of LEDs in a high RPM rotating display

Technical Skills

Software

Languages {x86_64, ARM, PIC} assembly, C/C++, Java, MATLAB, Python, Ruby, Bash

Environments Windows, Linux, Qt, LabVIEW

Toolchains Git, CMake, Make, NMake, GCC, Clang

Hardware

Embedded ATmega, MSP43x, PIC, STM32, {Cyclone, Arria 10} FPGA, Arduino, Raspberry Pi

Lab Oscilloscopes, function generators, DC power supplies, DMMs, LCR meters, vector network analyzers, spectrum analyzers, logic analyzers, frequency counters

Soldering Hands-on experience with DIP, SMT up to 01005, BGA, LGA, QFP packages

Tools

Simulation MATLAB, Simulink, PSpice, LTSpice, ModelSim, VCS-MX

Design Cadence, Altium, KiCad, Eagle, SOLIDWORKS

Languages

Native English

Native Mandarin Chinese

Basic German

Basic French
